

DATA AND CONSENT DECLARATION

EIC ACCELERATOR STAGE 1 SUBMISSION // AETERNA OMNICORE

To the European Commission and the European Innovation Council (EIC) Board,

I, the undersigned **Dimitar Prodromov**, acting as the Sovereign Systems Architect and authorized legal representative of the applicant entity **AETERNA**, hereby explicitly declare, consent, and certify compliance with the EIC Accelerator security, ethics, and data protection guidelines for the proposal **AETERNA OMNICORE**.

1. Consent to Data Processing & Evaluation

I hereby grant explicit consent to the European Innovation Council and SMEs Executive Agency (EISMEA), the EIC Jury, and external appointed technical experts to process the technical, financial, and clinical data submitted in this short application for evaluation purposes.

2. Absolute Data Residency & GDPR Compliance

I declare that the software architecture of AETERNA OMNICORE operates under a strict ****Zero-Entropy, On-Premise Execution**** paradigm. All patient-specific oncology data (VHT), submarine sensory telemetry streams (AIGIS), and cryptographic wealth transactions are processed entirely locally on on-premise Ryzen 7000/NVIDIA H100 hardware nodes. No Personal Identifiable Information (PII) or critical European telemetry is transmitted outside the sovereign borders of the European Union, complying fully with GDPR (EU Regulation 2016/679).

3. Exclusion of Sensitive Proprietary Intellectual Property

In compliance with Article 9(4) of CEF Regulation (EU) 2021/1153 and EU MDR Class III directives, the compiled execution binaries (lwas_core), offline AI weights, and physical CUDA sensory streams are held strictly offline to safeguard corporate patent structures. The evaluation panel is consented to audit the system interfaces, validated Concordance Indices, and terminal calibration telemetry as documented in this application.

Authorized Signature: [SIGNED ELECTRONICALLY]

Applicant Name: Dimitar Prodromov

Title: Sovereign Systems Architect

Entity: AETERNA

Validation Hash: 0xAE_88_F9_OMNICORE_LOGOS
